Contents

Maize (*Zea mays*) – SEED 6

Sorghum & Millet (*Sorghum bicolour&Pennisetum sp*) GRAIN/BRAN 7

Sorghum & Millet/Forage (Sorghum bicolour&Pennisetum sp) - SEED 7

Northern wild rice (*Zizania palustris*) -SEED 7

Rice (Oryza sativa) – SEED 8

Rice (Oryza sativa) – GRAIN/BRAN 8

Soya beans (Glycine sp) SEED 9

Sunflower (Helianthus annus) SEED 9

Sunflower *(Helianthus annus)* – GRAIN 9

Cowpeas/Beans (*Vigna sp/Phaseolus sp*) GRAIN 10

Cowpeas/Beans (Vigna sp/Phaseolus sp/ Glycine spp) - SEED 10

Fresh Cowpeas/Jugo beans/Beans/Groundnuts (*Vigna sp/Phaseolus sp/Arachis sp*) 10

Wheat (Triticum sp) – GRAIN/BRAN 11

Wheat (Triticum sp) – SEED ..... **Error! Bookmark not defined.**

Groundnuts (Arachis sp) GRAIN 11

Groundnuts *(Arachis sp)* SEEDS 12

Safflower seeds (Carthamus tinctorius) 12

Various seeds 13

Cherry plants (*Prunus yedoensis*) 13

Tobacco Seedlings 13

Tobacco -SEED 14

Tobacco leaves 14

Sunhemp Seeds (Crotalaria juncea) 14

Grapevine (*Vitis sp)* (Seedlings) 15

Apricot/Peach /Plum/Nectarines Plants (*Prunus sp*) 15

Citrus Plants/Buds (*Citrus spp*) 15

Mango Seedlings (*Mangifera spp*) 16

Lawn - Seedlings 16

Pepper *(Capsicum sp)* Seedlings 17

Tomato- seeds (*Lycorpesicon spp*) 17

Tomato (*Lycorpesicon* sp) Seedlings 18

Potato (*Solanum spp*) seeds/tubers/Sweet potatoes (Ipomea batatas) 18

Additional declaration on the Phytosanitary Certificate that: 18

1.The country / area of production is free from Ralstonia solanacearum, Clavibacter michiganensis, Synchytrium endobioticum and Pepper ringspot virus. 18

Mushroom Spawn (seed) 18

Mushroom in liquid tissue culture 19

Brassica spp/ Curcubita spp seedlings 19

Palm plants 19

Ornamental plants 19

Dried & Crushed Chili Pepper (*Capsicum sp*)/Dried Seamoss/Dried commodities .. 20

Timber 20

Timber with bark 20

Fresh cut flowers 20

Biological Control agents 20

Transit Permit 20

Garlic Seeds/Seedlings 20

Ginger Rhizome/Tumeric 21

Tamarind fruit (*Tamarindus indica*) 21

Broom creeper (Cocculus hirsutus) 21

Anacardium occidentale (Cashew nut) 22

Sugarcane (Saccharum officinarum) 22
Potting soil/Compost /Germination mix 22
Dried Sea moss (*Genus gracilaria*) 22
Barley (Hordeum spp) 23
Coffee seedlings (*Coffea Arabica*) 23
Coffee seeds (*Coffea arabica*) 23
Coffee bean (*Coffea Arabica*) 24
Invitro propagated/tissue culture plants 24
Aeroponics Plants 24
Cassava cuttings (*Manihot esculenta*) 24
Citrus seeds 25
Chicory seeds 25
Yam/Granadilla 25
Banana/Plantain seedlings (*Musa* SP) 25
Cassava tubers/leaves/Yam tubers 26
Pomegranate Seedlings 26
Quinoa seeds 26
Pigeon Pea – grain 27
Trichosanthes (Pointed Gourds) - Seedlings 27
Morula Dry Nut (Sclerocarya birrea) 27
Cashew nuts plants (Anacardium occidentale) 27
Pineapple Crown for Planting *(Ananas comosus)* 28
Australian Pine 28
Saffron seeds (*Crocus sativa*) 29
Strawberry Seedlings (*Fragaria x ananasa)* 29
Honeymelon Seedlings (*Cucumis melo*) 30
Dragon fruit seedlings 30

Persimmon seedlings (*Diospyros*) 30
Litch seedlings (*Litchi chinensis*) 32
Palm Seeds 32
Castor Bean Seeds (*Ricinus communis*) 32
Safflower grain (Carthamus tinctorius) 33
Safflower seeds (Carthamus tinctorius) 34
Soursop Fruit (Annona muricata) 34
Indian gingseng seeds *(Withania somnifera)* 35
Chia Seeds (Salvia hispanica) 35
Blackberry seedlings *(Rubus fruiticosus)* 35
Raspberry seedlings *(Rubus idaeus)* 36
Cranberry seedlings (*Vaccinium macrocarpon*) 37
Blueberry seedlings (*Vaccinium macrocarpon*) 37
Goji berry seedlings *(Lycium barbarum)* 37
Elderberry seedlings *(Sambucus nigra)* 37
Pecan nut Seedlings (Carya illinoinensis) 38
Olive seedlings *(Olea europaea)* 38
Coffee seedlings *(Coffea arabica)* 39
Prune seedlings (Prunus domestica) 39
Pricky pear (Opuntia basilaris) 40
Persimmon seedlings (*Diospyros*) 40
Duran Seedlings (*Durio zibethinus L.*) 41
Rambutan Seedlings (*Nephelium lappaceum L.*) 41
Jack fruit Seedlings (Artocarpus heterophyllus) 42
Loquat Seedlings (Eriobotrya japonica)) 42
Longan Seedlings (Dimocarpus longan) 43
Guava Seedlings (Psidium guajava) 43

Papaya Seedlings (*Carica papaya*) 44

Lucerne /Alfalfa Seedlings *(Medicago sativa)* 45

Lucerne seeds (*Medicago sativa*)- SEED 46

Sunhemp Seeds (Crotalaria juncea) 46

Velvet bean Seeds (*Mucana pruriens*) 47

Buckwheat seeds (Fagopyrum esculentum) 47

American Chestnut Seedlings *(Castanea dentata)* 48

Nuts (Walnuts, Almonds, Brazil, Hazel, Macademia Pistacoi, Pecan, Cashew) for human consumption 48

Macademia seedlings (*Macademia integrifolia*) 48

Watermelon Seedlings *(Citrullus lanatus)* 49

English Cucumber Seedlings (*Cucumis spp*) 49

Asparagus Seedlings *(Asparagus spp)* 50

Avocado Seedlings (Pearsea americana) 50

Pear seedlings *(Pyrus communis)* 51

Apple Seedlings *(Malus spp)* 52

Lettuce Seedlings *(Lactuca spp)* 52

Butternut Seedlings *(Cucurbita spp)* 54

Lab Lab seed (Lablab purpureus) 54

Brachiaria (Brachiaria spp) – SEED 54

Dried vegetable leaves.....

PHYTOSANITARY IMPORT CONDITIONS

Maize (*Zea mays*) – SEED

Additional declaration on the Phytosanitary Certificate from the National Plant Protection Organisation of the country of origin that:

1. *a. Clavibacter michiganensis* subs*. Nebraskensis* does not occur in the country/area of production

   OR

   b. The seed was laboratory tested and found to be free from the above pest.

2. *a. Peronosclerospora phillipensis* does not occur in the country/area of production

   OR

   b. The seed was laboratory tested and found to be free from the above pest.

3. *a. Cochliobolus heterostophus* does not occur in the country/area of production

   OR

   b. The seed was laboratory tested and found to be free from the above pest.

4. a. Maize lethal necrosis disease does not occur in the country/area of production

   OR

   b. The seed was laboratory tested and found to be free from the above pest.

5. a. *Maize dwarf mosaic* virus does not occur in the country/area of production

   OR

   b. The seed was laboratory tested and found to be free from the above pest.

6. The seed was treated with a specified seed dressing prior to packaging.

7. The seed is free from weed seeds.

Maize *(Zea mays)* – GRAIN/BRAN

Additional declaration on the Phytosanitary Certificate that:

1. *Prostephanus truncatus* and *Trogoderma granarium* does not occur in the country/area of production

OR

the consignment was inspected and found free from the above mentioned pests

OR

the consignment was fumigated with an appropriate fumigant, within two weeks prior to export against the above mentioned pests.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Sorghum & Millet (*Sorghum bicolour&Pennisetum sp*) GRAIN/BRAN

Additional declaration on the Phytosanitary Certificate that:

1. The *Trogoderma granarium* does not occur in the country/area of production

   OR

   the consignment was inspected and found free from the above mentioned pests
2. The consignment was fumigated with an appropriate fumigant 14 days prior to export, against the above mentioned pest.

3. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Sorghum & Millet/Forage (Sorghum bicolour&Pennisetum sp) - SEED

Additional declaration on the Phytosanitary Certificate that:

1. the seed was harvested from plants that were inspected and found to be free from downy mildew *Peronosclerospora phillipensis*

2. The seed was treated with a specified seed dressing prior to packaging.
3. The consignment was fumigated against insect pests with an appropriate fumigant 14 days prior to export.
4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Northern wild rice (*Zizania palustris*) -SEED

Additional declaration on the Phytosanitary Certificate that:

1. The seed was tested in the laboratory and found to be free from *Xanthomonas oryzae pv. oryzae*

2. the consignment was fumigated with an appropriate fumigant, within two weeks prior to export against *Sitotroga cerealella*.

3. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Rice (Oryza sativa) – SEED

Additional declaration on the Phytosanitary Certificate that:

1. The seed was tested in the laboratory and found to be free from Rice Yellow Mottle Virus, Barley Yellow Dwarf Virus, Rice Dwarf Virus, Rice Black Streaked Dwarf Virus and *Magnaportrhe oryzae*.
   OR

The above pathogens do not occur in the country/area of production

2. The seed was treated with a specified seed dressing prior to packaging.
3. The consignment was fumigated with an appropriate fumigant, within two weeks prior to export against insect pests.

4. Free from weed seed

5. New and Clean bags must be used for Packaging if packaging material is used OR the consignment must be in bulk.

Rice (Oryza sativa) – GRAIN/BRAN

Additional declaration on the Phytosanitary Certificate that:

1. The *Trogoderma granarium* and *Prostephanus truncatus* does not occur in the country/area of production

OR

The consignment was inspected and found free from the above mentioned pests

OR

The consignment was fumigated with an appropriate fumigant 14 days prior to export, against the above mentioned pest.

5. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Soya beans (Glycine sp) SEED

Additional requirements declaration on the Phytosanitary Certificate that:

1. the peanut stripe virus does not occur in the country/area of production
   OR
2. the parent plant(s) were inspected during active growth and found to be free from this virus

   OR
3. The consignment was tested and found free from the above mentioned virus.
4. The consignment was fumigated with an appropriate fumigant 14 days prior to export, against the above mentioned pest.

New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin

Sunflower (Helianthus annus) SEED

Additional declaration on the Phytosanitary Certificate that:

1. The parent plant(s) were inspected during active growth and found to be free from Downy mildew and Tobacco ringspot virus.
2. The seed was treated with a specified seed dressing prior to packaging.
3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Sunflower *(Helianthus annus)* – GRAIN

Additional declaration on the Phytosanitary Certificate that:

1. the Trogoderma granarium does not occur in the country/area of production
   OR

   The consignment was inspected and found free from the above mentioned pests

   OR

the consignment was fumigated with an appropriate fumigant 14 days prior to export, against the above mentioned pest.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Cowpeas/Beans (*Vigna sp/Phaseolus sp*) GRAIN

Additional requirements declaration on the Phytosanitary Certificate that:

1. the peanut stripe virus does not occur in the country/area of production

OR

the consignment was tested and found free from the above mentioned virus.

OR

The consignment was fumigated against insect pests within 14 days of dispatch

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Cowpeas/Beans (Vigna sp/Phaseolus sp/ Glycine spp) - SEED

Additional declaration on the Phytosanitary Certificate that:

1. Peanut stripe virus does not occur in the country/area of production

OR

The consignment was inspected and found to be free from the above mentioned pests.

OR

The consignment was tested and found free from the above mentioned virus

2. The seed was treated with a specified seed dressing prior to packaging.
3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Fresh Cowpeas/Jugo beans/Beans/Groundnuts (*Vigna sp/Phaseolus sp/Arachis sp*)

Additional declaration on the Phytosanitary Certificate that:

1. *Prostephanus truncatus* and *Trogoderma granarium* do not occur in the country/area of production

2. The consignment is free from soil and live pests

3. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

4. A representative sample shall be drawn at entry points by Agricultural Inspector of Plant Protection Division.

Wheat (Triticum sp) – GRAIN/BRAN

Additional declaration on the Phytosanitary Certificate that:

1. *Tilletia indica* do not occur in the country/area of production

   OR

   the consignment was laboratory tested and found free from the above pest

   OR

   the consignment was inspected and found free from the above mentioned pests

   OR

   The consignment was fumigated with Aluminium Phosphide, within two weeks prior to export against the above pests.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Wheat (*Triticum* sp) – SEED

Additional declaration on the Phytosanitary Certificate from the National Plant Protection Organisation of the country of origin that:

1. a. *Clavibacter michiganensis subs. Nebraskensis* does not occur in the country/area of production
   OR
   b. The seed was laboratory tested and found to be free from the above pest
2. a. *Tilletia indica d*oes not occur in the country/area of production
   OR
   b. The seed was laboratory tested and found to be free from the above pest
3. The seed was treated with a specified seed dressing prior to packaging.
4. The seed is free from weed seeds
5. The consignment was fumigated with an appropriate fumigant, within two weeks prior to export against *Prostephanus truncatus* and *Trogoderma granarium*

Groundnuts (Arachis sp) GRAIN

Additional declaration on the Phytosanitary Certificate that:

1. the peanut clump virus, peanut mottle virus and *Aphelenchoides arachidis* does not occur in the country/area of production

   OR

   the consignment was tested and found free from the above mentioned organisms
2. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
3. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin

Groundnuts *(Arachis sp)* SEEDS

Additional declaration on the Phytosanitary Certificate that:

1. the peanut clump virus, peanut mottle virus and *Aphelenchoides arachidis* does not occur in the country/area of production

   OR

   the parent plant(s) were inspected during active growth and found to be free from the above mentioned organisms

   OR

   the consignment was tested and found free from the above mentioned organisms
2. The seed was treated with a specified seed dressing prior to packaging.
3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin

Safflower seeds (Carthamus tinctorius)

Additional declaration on the Phytosanitary Certificate that:

1. The parent plant(s) were inspected during active growth and found to be free from Downy mildew and Tobacco ringspot virus

OR

the consignment was laboratory tested and found free from the above pest.

2. The seed was treated with a specified seed dressing prior to packaging.

3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Hermetically sealed seeds

1. The seeds are hermetically sealed and are from accredited companies.

2. The packaging must be fully labelled.

Cherry plants (*Prunus yedoensis*)

Each consignment must be accompanied by a Phytosanitary certificate declaring that

1. The plants are free from mites, Japanese wax scales (*Ceroplastes japonicus*) and live pests.

2. The plants are free from soil borne diseases

3. The growing medium is free from *Globodera spp*

OR

The country/area of production is free from *Globodera spp*.

Tobacco Seedlings

The consignment must be accompanied by a Phytosanitary certificate declaring that:

1 The *Alfafa mosaic* virus and *Tobacco streak* virus does not occur in the country of production

OR

The *Alfafa mosaic* virus and *Tobacco streak* virus does not occur in the area of production

OR

the consignment was tested and found free from the above mentioned organisms

2. The plants are free from live pests.
3. The plants are free from soil

OR

the growing medium is free from *Globodera spp*

OR

the country/ area of production is free from *Globodera spp*.

Tobacco -SEED

Additional declaration on the Phytosanitary Certificate that:

1. the *Alfafa mosaic* virus and *Tobacco streak* virus does not occur in the country of production

OR

the *Alfafa mosaic* virus and *Tobacco streak* virus does not occur in the area of production

OR

the consignment was tested and found free from the above mentioned organisms

2. The consignment was treated with a broad spectrum fungicide/insecticide against seed borne diseases.

Tobacco leaves

Additional declaration on the Phytosanitary Certificate that:

1. The consignment is free from plant debris and soil.
2. The consignment was fumigated against live pests.
3. The consignment was tested and found free from *Peronospora hyoscyami f.sp. tabacin*

Sunhemp Seeds (Crotalaria juncea)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that

1.The *Colletotrichum truncatum* does not occur in the country of production

OR

The *Colletotrichum truncatum* does not occur in the area of production

OR

The consignment was tested and found free from the above mentioned organisms.

2.The seeds were treated with a broad spectrum fungicide against seed borne diseases.

3.The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

NB: No conditions for hermetically sealed seeds.

Grapevine (*Vitis sp)* (Seedlings)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that;

1. The country of production is free from *Parthenolecanium sp* (scales) and *Pseudococcus sp* (mealy bugs)
2. The plants are free from live pests.

3. The plants are free from soil

4. The growing medium is free from Globodera spp

OR

The country/ area of production is free from Globodera spp. The consignment was inspected and found free from the above-mentioned pests.

Apricot/Peach /Plum/Nectarines Plants (*Prunus sp*)

Each consignment must be accompanied by a Phytosanitary certificate declaring that

1. The plants are free from live pests.

2. The plants are free from soil

3. The growing medium is free from *Globodera spp*

OR

The country/ area of production is free from *Globodera spp*.

Citrus Plants/Buds (*Citrus spp*)

Additional declaration on the Phytosanitary Certificate that:

1. The area/country of production must be free from *Candidatus liberibacter asiaticus*, *Xanthomonas citri*, *Pseudocercospora angolensis, Citrus leprosis –N disease* and *Phyllosticta citricarpa*

2. The plants are free from live pests.
3. The plants are free from soil

OR

The growing media is free from *Globodera spp.*

4. An invoice should be produced at port of entry indicating nurseries the seedlings were purchased from (Northern and Western cape)

Mango Seedlings (*Mangifera spp*)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Helicotylenchus multicintus

Helicotylenchus dihystera,

Meloidogne arenaria

Rotylenchulus reriformis

OR

The growing media is free from the above mentioned pests.

b. Diseases:

Pseudomonas syringae

Rhyzobium radiobacter

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Lawn - Seedlings

Each consignment must be accompanied by a Phytosanitary certificate declaring that
1. The lawn is free from soil
2. The growing medium is free from *Globoderra spp*

OR

The country/area of production is free from *Globodera spp*

Pepper *(Capsicum sp)* Seedlings

Additional declaration on the Phytosanitary Certificate that:

1.The country / area of production is free from *Pepper mild mottle virus* and *Pepper ringspot virus*

OR

The consignment was laboratory tested and found free from *Pepper mild mottle virus* and *Pepper ringspot virus*

2. The consignment was inspected and found to be free from *Tuta absoluta*
3. The plants are free from live pests.
4. The plants are free from soil

OR

The growing media is free from *Globodera spp* and *Paratrichodorus minor*

Tomato- seeds (*Lycorpesicon spp*)

Additional declaration on the Phytosanitary Certificate that the

1. Consignment is free from Tobacco ringspot virus, Pepper ringspot and Tomato black ring virus.
2. Consignment was fumigated with Aluminium Phosphide, within two weeks prior to export against the above pests.
3. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin

Brassica spp/ Curcubita spp seedlings

Additional declaration on the Phytosanitary Certificate that:

1. The plants to be free from live pests.
2. the plants must be free from soil
3. the growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be free from *Globodera spp*.

Tomato (*Lycorpesicon* sp) Seedlings

Additional declaration on the Phytosanitary Certificate that:

1. The country/ area of production is free from Tobacco ringspot virus, Pepper ringspot virus and Tomato black ring virus

OR

The consignment was laboratory tested and found free from *Tobacco ringspot virus, Pepper ringspot virus* and *Tomato black ring virus*

2. The consignment was inspected and found to be free from *Tuta absoluta*
3. The plants are free from live pests.
4. The plants are free from soil

OR

The growing media is free from *Globodera spp* and *Paratrichodorus minor*

Potato (*Solanum spp*) seeds/tubers/Sweet potatoes (Ipomea batatas)

Additional declaration on the Phytosanitary Certificate that:

1. The country / area of production is free from Ralstonia solanacearum, Clavibacter michiganensis, Synchytrium endobioticum and Pepper ringspot virus.

OR

The consignment was laboratory tested and found free from *Ralstonia solanacearum, Clavibacter michiganensis*, *Synchytrium endobioticum* and *Pepper ringspot virus*.

2. The tubers are free from live pests.
3.The tubers are free from soil

OR

The growing media is free from *Globodera spp* and *Paratrichodorus minor*

Mushroom Spawn (seed)

Additional declaration on the Phytosanitary Certificate that:

1. The *Trichoderma aggressivium, Trichoderma atroviride* and *Trichoderma harzianum* does not occur in the country of production

OR

The consignment was laboratory tested and found free from the above mentioned organisms

Mushroom in liquid tissue culture

Each consignment must be accompanied by an original Phytosanitary certificate declaring that:

1. All plants in the shipment are liquid tissue culture plants (in vitro propagated).

Brassica spp/ Curcubita spp seedlings

Additional declaration on the Phytosanitary Certificate that:

4. The plants to be free from live pests.
5. the plants must be free from soil
6. the growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be free from *Globodera spp*.

Palm plants

Additional declaration on the Phytosanitary Certificate that:

1. the plants to be free from live pests and eggs
2. the place of production is free from Palm Lethal Yellowing disease
3. the growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be free from *Globodera spp*

Ornamental plants

Additional declaration on the Phytosanitary Certificate that:

1. The plants are free from live pests and eggs

2. The plants must be free from soil
3. The growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be certified to be free from *Globodera spp.*

Dried & Crushed Chili Pepper (*Capsicum sp*)/Dried Seamoss/Dried commodities

Additional declaration on the Phytosanitary Certificate that:

Each consignment must be accompanied by an original phytosanitary certificate declaring the consignment to be free from harmful organisms and injurious diseases.

Timber

The timber must be accompanied by a Phytosanitary certificate from the National Plant Protection Organisation of the country of origin declaring the timber to be free from bark, insect wood borers and moulds.

Timber with bark

The timber must be accompanied by a Phytosanitary certificate from the National Plant Protection Organisation of the country of origin declaring that:

1. the consignment was fumigated against insect pests with an appropriate fumigant 14 days prior to export.

2. the consignment is free from moulds.

Fresh cut flowers

Each consignment must be accompanied by phytosanitary certificate declaring the flowers to be free from live pests. The flowers must be free from soil.

Biological Control agents

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that it is free from contaminants especially the hosts from the source country. The material safety sheet must accompany the consignment. The consignment must be sealed in properly labeled containers indicating the name and origin of consignment.

Transit Permit

The consignment is in transit through Republic of Botswana from ----------to Republic of ---------- and must be accompanied by an original Phytosanitary certificate satisfying the conditions of the importing country if required by the importing country. The consignment must be sealed at port of entry and the seal maintained intact up to point of exit from Republic of Botswana.

Garlic Seeds/Seedlings

Each consignment must be accompanied by an original Phytosanitary certificate declaring:

1. The seed to be free from insect pests

2. The seeds were laboratory tested and found free from the following diseases *(Fusarium proliferatum, Tobacco rattle virus, Iris yellow spot virus and Onion yellow dwarf virus)*

3. The seeds to be free from soil.

Ginger Rhizome/Tumeric

Additional declaration on the Phytosanitary Certificate that:

1. The plants to be free from live pests and eggs.
2. The plants must be free from soil
3. The growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be free from *Globodera spp*

Tamarind fruit (*Tamarindus indica*)

Additional declaration on the Phytosanitary Certificate that:

1. the *Trogoderma granarium* does not occur in the country/area of production

   OR

   the consignment was inspected and found free from the above mentioned pests

   OR

   the consignment was fumigated with an appropriate fumigant 14 days prior to export, against the above mentioned pest.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Broom creeper (Cocculus hirsutus)

Each consignment must be accompanied by a Phytosanitary certificate declaring that:

1. The plants are free from live pests.

2. The plants are free from soil.

3. There are no seeds on the plants

4. The plants should not be used for propagation

Anacardium occidentale (Cashew nut)

Additional declaration on the phytosanitary certificate from the National Plant Protection Organisation of the country of origin that:

1. the country of origin or area of production is free from

   Insects: *Bactrocera dorsalis complex*

OR

the consignment was exposed to internationally recognized fruit fly postharvest treatment and a treatment certification should accompany the consignment.

OR

The consignment was inspected and found to be free from the above mentioned pests.

2. Consignment is prepacked in labeled polythene plastic bags/Crates/ boxes (label must show producer's name and address)

3. A representative sample shall be drawn at entry points by Agricultural Inspector.

Sugarcane (Saccharum officinarum)

Additional declaration on the Phytosanitary certificate from the National Plant Protection Organisation of the country of origin that:

1. The country of origin or area of production is free from

   Virus: Sugarcane striate mosaic virus
   Sorghum mosaic virus
   Sugarcane mosaic virus

2. The consignment was inspected and found to be free from the above mentioned pests.

Potting soil/Compost /Germination mix

Each consignment must be accompanied by an original phytosanitary certificate declaring the consignment to be free from harmful organisms and injurious diseases.

Dried Sea moss (*Genus gracilaria*)

Additional declaration on the Phytosanitary Certificate that:

Each consignment must be accompanied by an original phytosanitary certificate declaring the consignment to be free from harmful organisms and injurious diseases.

Barley (Hordeum spp)

Additional declaration on the Phytosanitary Certificate that:

1. Consignment to be free from Barley stripe mosaic virus

   OR

   the consignment was tested and found free from the above mentioned organisms

2. Consignment to be free from live storage pests, soil and extraneous material.
3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin

Coffee seedlings (*Coffea Arabica*)

Additional declaration on the Phytosanitary Certificate that:

1. The consignment is free from the following diseases:
   a) *Fusarium xylarioides*
   b) *Hemileia vastatrix*
   c) *Colletotrichum kahawae*
   d) *Cercospora coffeicola*

2. The consignment is free from the following nematodes:
   a) *Helicotylenchus*
   b) *Scutellomena*
   c) *Rotylenchus*
   d) *Xiphinema*
   e) *Heterodera*
   f) *Tylenchorhynchus*

Coffee seeds (*Coffea arabica*)

Additional declaration on the Phytosanitary Certificate that the consignment is free from *Hypothenemus hampei*.

Coffee bean (*Coffea Arabica*)

Additional requirements declaration on the Phytosanitary Certificate that:

1. The consignment was fumigated against insect pests within 14 days of dispatch, with appropriate fumigant.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Invitro propagated/tissue culture plants

Each consignment must be accompanied by an original Phytosanitary certificate declaring that:

1. All plants in the shipment are tissue culture plants (in vitro propagated)

2. All plants were inspected and found to be free from signs and symptoms of harmful pests

Aeroponics Plants

Each consignment must be accompanied by an original Phytosanitary certificate declaring that:

1. All plants in the shipment are aeroponics.
2. The flowers must be free from soil or growing medium.
3. All plants were inspected and found to be free from signs and symptoms of harmful pests.

Cassava cuttings (*Manihot esculenta*)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that:

The consignment was tested and found to be free from Cassava Brown Streak Virus and Cassava Mosaic Virus

OR

The area of production is free from the above pests

Citrus seeds

Each consignment must be accompanied by a Phytosanitary Certificate declaring that

1.The seeds were produced from an area free from *Citrus leprosis-N disease* and greening disease *(Candidattus liberibacter asiaticus)*.

2. The Citrus seeds should be tested and found free from

a). Alternaria alternate

b). Fusarium oxysporum f.sp. lycopersici

3. The seeds must be free from live pests

4. The seeds must be free from soil

5. The seed was treated with a specified seed dressing prior to packaging.

Chicory seeds

Each consignment must be accompanied by a Phytosanitary Certificate declaring that

1. The area of production is free from *Chicory mottle virus and lettuce mosaic virus*

Yam/Granadilla

The consignment must be accompanied by a Phytosanitary certificate with additional declaration that the produce is free from *Prostephanus truncatus* and *Trogoderma granarium*

OR

The consignment must be fumigated with Aluminium Phosphide, within two weeks prior to export, against the above pests.

Banana/Plantain seedlings (*Musa* SP)

Additional declaration on the Phytosanitary Certificate that

1. All plants in the shipment are tissue cultured plants (in vitro propagated)

2. *Fusarium oxysporum f. sp cubense (*FoC*) and Banana bunchy top virus (BBTV)* does not occur in the country of production / the area of production

OR

The consignment was laboratory tested and found free from the above mentioned organisms

3. The plants are free from live pests.

4. The growing medium must be free from soil

5. The growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be certified to be free from *Globodera spp.*

Cassava tubers/leaves/Yam tubers

The consignment must be accompanied by a Phytosanitary certificate with additional declaration that the produce is free from *Prostephanus truncatus* and *Trogoderma granarium*

OR

The consignment must be fumigated with Aluminium Phosphide, within two weeks prior to export, against the above pests.

Pomegranate Seedlings

Additional declaration on the Phytosanitary Certificate that:

1. The plants to be free from live pests and eggs.
2. The plants must be free from soil
3. The growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be free from *Globodera spp*

Quinoa seeds

Additional declaration on the Phytosanitary Certificate that:

4. Sowbane Mosaic Virus do not occur in the country/area of production
   OR
   the consignment was laboratory tested and found free from the above pest

5. The consignment was fumigated with Aluminium Phosphide, within two weeks prior to export against the above pests.

6. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin

Pigeon Pea – grain

Additional declaration on the Phytosanitary Certificate that:

1. The consignment was fumigated with Aluminium Phosphide, within two weeks prior to export against the above pests.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Trichosanthes (Pointed Gourds) - Seedlings

Additional declaration on the Phytosanitary Certificate that:

1. The consignment is free from live pest

Morula Dry Nut (Sclerocarya birrea)

Each consignment must be accompanied by an original Phytosanitary certificate declaring that:

1. The consignment was fumigated against insect pests within 14 days of dispatch, with appropriate fumigant.

   Or

   the consignment was inspected and found free from live pests.

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Cashew nuts plants (Anacardium occidentale)

Additional declaration on the Phytosanitary Certificate that:

1. The plants to be free from live pests and eggs.

2. The plants must be free from soil
   OR

The growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be free from *Globodera spp*

Pineapple Crown for Planting *(Ananas comosus)*

Additional declaration on the Phytosanitary Certificate that the consignment was tested and found to be free from the following:

1. *Candidatus Phytoplasma asteris*
2. *Dickeyachrysanthemi*
3. *Dickeya zeae*
4. *Helicotylenchus dihystera*
5. *Hemicriconemoides mangiferae,Pantoea ananatis*
6. *Pseudomonas marginalis pv. marginalis*
7. *Radopholus similis*
8. *Rotylenchulus reniformis*
9. *Scutellonema brachyurus*

Australian Pine

Additional declaration on the Phytosanitary Certificate that:

1. The plants are free from live pests.
2. The country/ area of production is free from *Globodera spp*
   OR

   The growing medium is certified to be free from *Globodera spp*

3. The plants are free from soil
4. The consignment was tested and found to be free from the following:
   - *Paratrichodurus porosus*
   - *phytophthora cambivora*

- *Ralstonia solanacearum*

Saffron seeds (*Crocus sativa*)

1. Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that the seeds were treated with a broad spectrum fungicide against seed borne diseases.
2. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
3. The consignment was tested and found to be free from the *Ditylenchus dipsaci.*

NB: No conditions for hermetically sealed seeds

Strawberry Seedlings (*Fragaria x ananasa)*

Additional declaration on the Phytosanitary Certificate that:

1. The plants are free from live pests and eggs

2. The plants must be free from soil

3. The growing medium must be certified to be free from *Globodera spp*

OR

The country/ area of production must be certified to be free from *Globodera spp.*

Kiwi Seedlings (*Actinidia deliciosa*)

Additional declaration on the Phytosanitary Certificate that:

1. The plants are free from live pests and eggs.
2. The plants are free from soil
3. The growing medium is certified to be free from

Globodera spp

Helicotylenchus dihystera

Meloidgyne arenaria

Meloidegyne ethiopica

Pratylenchus vulnus

OR

The country/ area of production is free from the above mentioned pests.

4. The consignment was tested and found to be free from the following

Phytophthora medicaglinis

Pseudomonas savastanoi

Honeymelon Seedlings (*Cucumis melo*)

Additional declaration on the Phytosanitary Certificate that:

1. The plants are free from live pests and eggs.
2. The plants are free from soil
3. The growing medium is certified to be free from

Globodera spp

Melyidogyne hapla

OR

The country/ area of production is free from the above mentioned pests.

Dragon fruit seedlings (*Hylocereus undantus*)

Additional declaration on the Phytosanitary Certificate that:

1.The plants are free from live pests and eggs.

2.The plants are free from soil

3. The growing medium is certified to be free from *Globodera spp*

OR

The country/ area of production is free from *Globodera spp.*

Persimmon seedlings (*Diospyros*)

Additional declaration on the Phytosanitary Certificate that:

1.The plants are free from live pests and eggs.
2.The plants are free from soil
3.The growing medium is certified to be free from

Globodera spp

Heliotylenchus pseudorobustus

OR

The country/ area of production is free from *Globodera spp.*

4. The consignment was tested and found to be free from the following

Pseudomonas syringe

Rhyzobium radiobacter

Wild loquat Fruit (*Eriobotrya japonica*)

Additional declaration on the Phytosanitary Certificate that:

1. The consignment is free from live pests and eggs.
2. The consignment is free from soil
3. The consignment was tested and found to be free from the following

Collectotrichum acutatum

Ceratostis fimbriata

Diplodia seriata

Phytophthora cactorum

4. Grapholita molesta does not occur in the country/area of production

OR

the consignment was inspected and found free from the above mentioned pests.

Litch seedlings (*Litchi chinensis*)

Additional declaration on the Phytosanitary Certificate that:

1. The plants are free from live pests and eggs.
2. The plants are free from soil
3. The growing medium is certified to be free from

Globodera spp

Hemicriconemoides mangiferaea

Rotylenchus reniformis

Tylenchorhynchus claytoni

OR

The country/ area of production is free from the above mentioned pests.

Palm Seeds

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that

1. The seeds were treated with a broad spectrum fungicide against seed borne diseases.
2. The consignment was fumigated against insect pests with an appropriate fumigant 14 days prior to export.
3. The consignment was tested and found to be free from the following *Colletotrium gloeosporioides*

Castor Bean Seeds (*Ricinus communis*)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that

1. The *Tobacco streak* virus does not occur in the country of production

OR

The *Tobacco streak* virus does not occur in the area of production

OR

The consignment was tested and found free from the above mentioned organisms.

2. The seeds were treated with a broad spectrum fungicide against seed borne diseases.

3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

NB: No conditions for hermetically sealed seeds.

Additional declaration on the Phytosanitary Certificate that:

1. The consignment was fumigated with an appropriate fumigant 14 days prior to export

2. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Safflower grain (Carthamus tinctorius)

Additional declaration on the Phytosanitary Certificate that:

1. the Alfalfa virus and Lettuce mosaic virus does not occur in the country/area of production
   OR

   the consignment was tested and found free from the above mentioned organisms

2. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

3. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpauli

Safflower seeds (Carthamus tinctorius)

Additional declaration on the Phytosanitary Certificate that:

1. The parent plant(s) were inspected during active growth and found to be free from Tobacco ringspot virus

   OR

   the consignment was laboratory tested and found free from the above pest.

2. The seed was treated with a specified seed dressing prior to packaging.

3. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

4. New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.

Soursop Fruit (Annona muricata)

Additional declaration on the phytosanitary certificate from the National Plant Protection Organisation that:

1. The country of origin or area of production is free from

Insects: *Aleurodicus disperses*
Atherigona orientalis
Ceratitis rosa
Dacus bivittatus
Thaumatotibia leucotreta

OR

The consignment was exposed to internationally recognized fruit fly postharvest treatment and a treatment certification should accompany the consignment.

OR

The consignment was inspected and found to be free from the above mentioned pests.

2. Consignment is prepacked in labeled polythene plastic bags/Crates/ boxes (label must show producer's name and address)

3. A representative sample shall be drawn at entry points by Agricultural Inspector.

Indian gingseng seeds *(Withania somnifera)*

Additional declaration on the phytosanitary certificate from the National Plant Protection Organisation that:

1. The consignment was inspected and found to be free from live pests.
2. The consignment was laboratory tested and found free from the following

Diseases : *Alternaria dianthicola*
Choanephora cucurbitarum
Cochliobolus lunatus
Cucumber green mottle mosaic virus
Glomerella cingulata

Chia Seeds (Salvia hispanica)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that:

1. The consignment was laboratory tested and found free from the following

Diseases : *Cowpea mild mottle virus*
Angular mosaic of beans

2. The consignment was fumigated against insect pests with an appropriate fumigant 14 days prior to export.

NB: No conditions for hermetically sealed seeds.

Blackberry seedlings *(Rubus fruiticosus)*

Additional declaration on the Phytosanitary certificate from the National Plant Protection Organisation of the country of origin that:

1. The country of origin or area of production is free from

Virus: *Tylenchorhynchus claytoni*
Xiphinema diversicandatum

Diseases : *Candidatus phytoplasma*

Peronospora sparsa

OR

The consignment was laboratory tested and found free from the above pests

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Raspberry seedlings *(Rubus idaeus)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

Nematodes *Globodera spp,*

Pratylenchus penetraus

Pratylenchus vulnus

Diseases : *Candidatus phytoplasma*

Iris yellow spot virus

Prunus necrotic ringspot virus

Tobacco streak virus

OR

The consignment was laboratory tested and found free from the above pests

3. The plants are free from live pests and eggs.

4. The plants are free from soil

Cranberry seedlings (*Vaccinium macrocarpon*)

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from
Globodera sp
2.The consignment was laboratory tested and found free from the following
Diseases : *Fusarium oxysporum*
Botryosphaeria parva
Phomopsis
3.The plants are free from live pests and eggs.

4. The plants are free from soil

Blueberry seedlings (*Vaccinium macrocarpon*)

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from
Globodera sp
2.The consignment was laboratory tested and found free from the following
Diseases : *Fusarium oxysporum*
Botryosphaeria parva
Phomopsis
3.The plants are free from live pests and eggs.

4. The plants are free from soil

Goji berry seedlings *(Lycium barbarum)*

Additional declaration on the Phytosanitary Certificate that:

1. The consignment was laboratory tested and found free from

Diseases : *Fusarium oxysporum*

2. The plants are free from live pests and eggs.
3. The plants are free from soil
4. The growing medium is certified to be free from

Globodera spp

Elderberry seedlings *(Sambucus nigra)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

Nematodes: *Globodera spp,*

Trichodorus obtusus
Xiphinema diversicandatum
Diseases : *Arabis Mosaic Virus*
Berkeleyomyces basicota
OR
The consignment was laboratory tested and found free from the above pests

2. The plants are free from live pests and eggs.
3. The plants are free from soil

Pecan nut Seedlings (Carya illinoinensis)

Additional declaration on the Phytosanitary Certificate that:

1.The consignment was laboratory tested and found free from the following

Diseases : *Fusarium oxysporum*
Botryosphaeria parva
Phomopsis

2. The plants are free from live pests and eggs.
3. The plants are free from soil
4. The growing medium is certified to be free from

Globodera spp

Olive seedlings *(Olea europaea)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

Nematodes *Globodera spp,*

Ditylenchus dipsaci,

Tylenchulus semipetrans

Zygotylenchus guevaria

Diseases : *Pseudomonas savatoria*

Phaeoacremonium aleophilum

OR

The consignment was laboratory tested and found free from the above pests

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Coffee seedlings *(Coffea arabica)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

Nematodes: *Globodera spp,*

Helicotylenchus multicintus

Helicotylenchus dihystera,

Radopholus similis, Pratylenchus coffeae

Rotylenchulus reriformis

Diseases: *Ceratocystis fimbriata*

Gibberella xylanoides

Pseusomonas spp

The consignment was laboratory tested and found free from above pests

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Prune seedlings (Prunus domestica)

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

Globodera spp,

Helicotylenchus dihystera,

Phytophthora cambivora,

Pratylenchus spp

Rotylenchus reriformis

Diseases: *Berkeleyomyces basicola*

Ceratocytis frimbriata

Phomopsis

Prunus necrotic Ringspot virus

Rhizobium radiobacter

Pseudomonas syringae

OR

The consignment was laboratory tested and found free from the above pests

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Pricky pear (Opuntia basilaris)

Additional declaration on the Phytosanitary Certificate that:

Additional declaration on the Phytosanitary Certificate that

1.The country of origin or area of production is free from

Globodera spp

2. The consignment was laboratory tested and found free from the following:

Diseases: *Candidatus phytoplasma*

3. The plants are free from live pests and eggs.

4. The plants are free from soil

5. The growing medium is certified to be free from

Globodera spp

Persimmon seedlings (*Diospyros*)

Additional declaration on the Phytosanitary Certificate that:

1.The growing medium is certified to be free from

Globodera spp

Heliotylenchus pseudorobustus

OR

The country/ area of production is free from *Globodera spp.*

2. The consignment was tested and found to be free from the following

Pseudomonas syringe

Rhyzobium radiobacter

3.The plants are free from live pests and eggs.
4.The plants are free from soil

Duran Seedlings (*Durio zibethinus L.*)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from *Globodera spp*

OR

The growing medium is certified to be free from *Globodera spp*

2. The plants are free from live pests and eggs.

3. The plants are free from soil.

Rambutan Seedlings (*Nephelium lappaceum L.*)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from *Globodera spp*

OR

The growing medium is certified to be free from Globodera *spp*

3. The plants are free from live pests and eggs.

4. The plants are free from soil

Jack fruit Seedlings (Artocarpus heterophyllus)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Meloidgne enterobii

Hermicriciconemoides mangiferae

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Ceratocystis fimbriata

Ceratocystis blight

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Loquat Seedlings (Eriobotrya japonica))

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Pratylenchus penetrans

Pratylenchus vulnus

Helicotylenchus dihystera

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Ceratocystis fimbriata

Endidatus phytoplasma asteris

Rhizobium radiobacter

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Longan Seedlings (Dimocarpus longan)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Hermicriciconemoides mangiferae

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Candidatus phytoplasma aurantifolia

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Guava Seedlings (Psidium guajava)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Meloidogyne arenaria

Meloidogyne enterolobii

Meloidogyne mayaguensis

Rotylenchulus reniformis

Pratylenchus coffeae

Pratylenchus zeae

Helicotylenchus dihystera

OR

The growing medium is free from the above mentioned pests.

2. The plants are free from live pests and eggs.

3. The plants are free from soil.

Papaya Seedlings (*Carica papaya*)

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Helicotylenchus multicintus

Helicotylenchus dihystera,

Helicotylenchus Pseudoro bustus

Hemicriconemoides mangiferae

Meloidogne arenaria

Meloidogne eterolobii

Rotylenchulus reniformis

Pratylenchulus penetrans

Scutellonema brachyurus

Scutellonema clathricaudatum

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Candidatus phytoplama asteris

Papaya mosaic virus

Zucchini yellow mosaic virus

Tomato New Delhi virus

Papaya ringspot virus

Dickeya zeae

Phytoplasma aurantifolia

Pseudoidium neolycopersici

Tobaco streak virus

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Lucerne /Alfalfa Seedlings *(Medicago sativa)*

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Helicotylencus dihystera

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Alfalfa mosaic virus

Rhizobium radiobacter

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Lucerne seeds (*Medicago sativa*)- SEED

Additional declaration on the Phytosanitary Certificate that:

1. **The seed was treated with a specified seed dressing prior to packaging.**

2. **the consignment was fumigated with an appropriate fumigant, within two weeks prior to export against live pests.**

3. **Free from weed seed**

4. **New and Clean bags must be used for Packaging. Bulk consignment must be covered in tarpaulin.**

Sunhemp Seeds (Crotalaria juncea)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that

1.The *Colletotrichum truncatum* does not occur in the country of production

OR

The *Colletotrichum truncatum* does not occur in the area of production

OR

The consignment was tested and found free from the above mentioned organisms.

2.The seeds were treated with a broad spectrum fungicide against seed borne diseases.

3.The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

NB: No conditions for hermetically sealed seeds.

Velvet bean Seeds (*Mucana pruriens*)

Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that

1.The *Cowpea mild rottle virus* does not occur in the country of production

OR

The *Cowpea mild rottle virus* does not occur in the area of production

OR

The consignment was tested and found free from the above mentioned organisms.

2.The seeds were treated with a broad spectrum fungicide against seed borne diseases.

3.The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

NB: No conditions for hermetically sealed seeds.

Buckwheat seeds (Fagopyrum esculentum)

3. Each consignment must be accompanied by a Phytosanitary certificate with additional declaration that the seeds were treated with a broad spectrum fungicide against seed borne diseases.

4. The seed was treated with a specified seed dressing prior to packaging.
5. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.

6. The packaging must be fully labelled.

NB: No conditions for hermetically sealed seeds

American Chestnut Seedlings *(Castanea dentata)*

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,
Criconemella spp

OR

The growing medium is free from the above mentioned pests.

2. The plants are free from live pests and eggs.

3. The plants are free from soil.

Nuts (Walnuts, Almonds, Brazil, Hazel, Macademia Pistacoi, Pecan, Cashew) for human consumption

Additional declaration on the Phytosanitary Certificate that:

1. The consignment must be fumigated against insect pests with an appropriate fumigant 14 days prior to export.
2. New and Clean bags must be used for Packaging. Bulk consignment must be covered
3. A representative sample shall be drawn at entry points by Agricultural Inspector.

Macademia seedlings (*Macademia integrifolia*)

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

OR

The growing medium is free from the above mentioned pests.

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Watermelon Seedlings *(Citrullus lanatus)*

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,
Merlinius spp
Pratylenchus spp

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Altenaria alternate
Fusarium oxysporum
Cucumber mosaic virus
Moroccan watermelon mosaic virus

2. The plants are free from live pests and eggs.

3. The plants are free from soil

English Cucumber Seedlings (*Cucumis spp*)

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Alternaria alternate

Fusarium oxysporum

Groundnut ringspot virus

Cucumber mosaic virus

Arabis mosaic virus

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Asparagus Seedlings *(Asparagus spp)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Xiphinema

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Fusarium oxysporum

Arabis mosaic virus

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Avocado Seedlings (Pearsea americana)

Additional declaration on the Phytosanitary Certificate that:

1. The country of origin or area of production is free from

a. Nematodes:

Globodera spp,
Radopholus similis
Rotylenchulus reniformis
Helicotylenchus multicinctus
Helicotylenchus dihystera
Helicotylenchus pseudorobustus

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Rhizobium radiobacter

Pseudomonas syringae

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Pear seedlings *(Pyrus communis)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from
Globodera spp,

OR

The growing medium is free from the above mentioned pests.

2. The plants are free from live pests and eggs.

3. The plants are free from soil

Apple Seedlings *(Malus spp)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Trichodorus spp

Xiphineme spp

Pratylenchus spp

OR

The growing medium is free from the above mentioned pests.

b. Diseases:

Fusarium oxysporum

Cucumber mosaic virus

Gibbrella spp

Hypoxylon spp

Penicillium spp

OR

The consignment was laboratory tested and found free from the above.

2.The plants are free from live pests and eggs.

3.The plants are free from soil

Lettuce Seedlings *(Lactuca spp)*

Additional declaration on the Phytosanitary Certificate that:

1.The country of origin or area of production is free from

a. Nematodes:

Globodera spp,

Trichodorus spp

OR

The growing medium is free from the above mentioned pests.

2.The consignment was laboratory tested and found free from the following:

Diseases:

Arabis mosaic virus

Broad bean wilt virus

Groundnut ringspot virus

Lettuce mosaic virus

Mirafiori lettuce virus

Tobacco necrosis virus

Tobacco rattle virus

Tomato chlorotic spot virus

Cucumber mosaic virus

Alteneria spp

Fusarium oxysporum

Gibbrella spp

Myrotheciun roridum

Phytophthora

Drechsleri

Podosphaera fusca

Pythium spp

Sclerotinia minor

Trichodema harzianum

3. The plants are free from live pests and eggs.
